

Introduction: Ashwagandha coffee combines the adaptogenic herb with coffee for a calming, focused energy boost.

Adaptogens: Ashwagandha is a powerful adaptogen that helps the body manage stress and balance cortisol levels.

Benefits: May reduce anxiety, improve sleep quality, enhance cognitive function, and support immune health.

Preparation: Mix ashwagandha powder with brewed coffee, milk, and sweetener; blend for a smooth latte.

Warnings: Consult a doctor if pregnant, nursing, or on medications. May cause mild stomach upset.

Research: Studies show ashwagandha can lower stress markers and improve brain function in healthy adults.
